

February 2017
FOR IMMEDIATE RELEASE

New £1.2m TeamSport indoor go-karting track opens in Sheffield

TeamSport Karting, the UK's leading company for indoor go-karting, has opened its new £1.2 million track in Sheffield this month.

The track, situated on Shepcote Lane, just two miles from Meadowhall, is the first ever go-karting track in the UK to have four levels, making it perfect for ultimate thrill seekers. It opened its doors on Saturday 11th February 2017 and will be TeamSport's 20th venue in the UK.

Racegoers can look forward to a massive international circuit racing over four levels of nail biting bends, exhilarating long straights and jaw dropping ramps for up to 20 karters to race around at any one time.

Facilities available at the track include meeting facilities, private party rooms and ['Fuel'](#) - the track's fully-licenced snack bar - serving up a range of rustic pizzas, baguettes and refreshing drinks, perfect for refuelling after a rapid few laps around the track.

TeamSport is also bringing new opportunities for the local community, as the track will be hiring for up to 40 full and part-time jobs.

Dom Gaynor, Managing Director of TeamSport Karting, said: "We're very excited to be launching our first four level circuit at the Sheffield track in a prime location close to Meadowhall. Sheffield is a thriving place and it is fantastically exciting for us to open our 20th track & such a great facility in the City."

"The track is the perfect place for an action-packed family day out that offers a safe, unique and great value-for-money go-karting experience.

"Whether you're heading down to finally put a stop to your friend's false claims of being the best driver, or making the most of our meeting facilities by bringing your staff for an action-packed corporate go-karting event, the Sheffield track will suit everyone's needs.

"We're hoping for more people to start up indoor go-karting as a hobby, which we are fully supporting by running offers such as half price Wednesdays and discounts for students and forces."
